

Teams group formation	You will be added to the Microsoft Teams in the morning of the workshop. You are free to form your group there as soon as you wish. At 9.00, we will open an initial call and chat about the workshop, and we can also continue our team formation in the call.
Materials available	In the “files” section of the teams group you will find the fill-in documents, the dataset and a code that helps you solve the tasks.
Intermediary submission	You will have to return in the “Intermediary Submission” assignment in teams the tasks that you solved with your team-mate up until 10.30 . After you have submitted the intermediary submission, you are encouraged to go and collaborate with other groups by joining their calls.
Final submission	At the end of the workshop, the final submissions are uploaded in the “Final Submission” assignment. If your team chooses to collaborate with another team, one submission is enough, but make sure to write up the names of all the team members in the submission.
